Firewall Rules for Cassandra

This page is based on the architecture of Feedzai standard solutions. Specific clients or custom solutions may have additional requirements, so this is not a definitive guide.

Inbound

Inbound other services connect to this service.

Service	Port	Description
Cassandra	TCP 7000-7001	Cluster communication
Pulse	TCP 9042	Requests from Cassandra Driver
Reference Data Service	TCP 9042	Requests from Cassandra Driver
SSH	TCP 22	SSH access (if available)

Outbound

Outbound this service connects to external services.

Service	Port	Description
Cassandra	TCP 7000-7001	Connection to the database
