Upgrade JupyterLab version to 25.0.46

Feature FTMT-27382 HSBC-3084 HSBC-3375

We have upgraded JupyterLab to version 25.0.46 to fix the missing `timestampField` dependencies in List operators when duplicating a plan using the `ds-api`, as well as including the SHAP Python package.

The new Docker image will have to be loaded in existing environments. Please find it in the [Installation Guide](#).
