HSBC-3050-Add-filtered-index-on--customer-citizen-id-number--to-optimize-Case-Manager-searches

Add filtered index on `customer_citizen_id_number` to optimize Case Manager searches[a](#)[a](#)

Feature HSBC-3050

Also In: 2.8.1 2.9.0

We've recreated the `customer_citizen_id_number` indexes to improve performance by removing non-null values from the index. This change is specially helpful during Case Manager searches in deployments where `customer_id` is used instead of `customer_citizen_id_number`.
