## HSBC-3621

### Upgrade Data Extraction Pipelines to version 2.1.1

Feature FTMT-26459 FTMT-30590 HSBC-3367 HSBC-3621 HSBC-3330

We've upgraded the Data Extraction Pipelines to version 2.1.1.

This upgrade includes the following changes:

- Support for Logstash 9.1.4 by upgrading the existing pipelines and service configuration files. It addresses [CVE-2022-1471](#) and [CVE-2025-52999](#)
- Logstash can now be executed with a keystore
- Fix an issue where the Logstash recovery process pipeline would get stuck, causing Ansible to wait indefinitely

Please note this is a breaking change since the new Data Extraction Pipelines package requires Java 17 or 21.

For more information refer to [Data Extraction Pipelines Requirements](#) and also to [Data Extraction Pipelines Configurations](#).
