Firewall Rules for ZooKeeper

This page is based on the architecture of Feedzai standard solutions. Specific clients or custom solutions may have additional requirements, so this is not a definitive guide.

Inbound

Inbound other services connect to this service.

Service	Port	Description
ZooKeeper	TCP 2888	Peer communication
ZooKeeper	TCP 3888	Peer communication
Pulse	TCP 2181	ZooKeeper Client communication
SSH	TCP 22	SSH access (if available)

Outbound

Outbound this service connects to external services.

Service	Port	Description
ZooKeeper	TCP 2888	Peer communication
ZooKeeper	TCP 3888	Peer communication
