Generated Fields

The Payments API generates fields that will be sent to the Pulse Workflow alongside the ones received in the API.

event_type

The `event_type` will be set according to the endpoint used to receive the request:

Endpoint	event_type
Payment	payment
Info	info
Settlement	settlement

Endpoint	event_type
Feedback	feedback
Reponses	responses

event_received_at

The `event_received_at` represents the time the request reached the Payments API as a timestamp, in milliseconds.
